# For a Clean, Clear and Healthy Ecosystem – Pond Biologics®

Bio-Buster™ is a custom blend of naturally occurring microorganisms and enzymes, compressed in an easy to apply pellet. Bio-Buster™ is designed to naturally reduce organic sediment in ponds, lakes and waste-water lagoons while also reducing odors and improving water clarity. Bio-Buster™ muck reduction pellets are self-sinking and attack organic sediment (muck) directly. Bio-Buster™ pellets assist in the digestion of leafy debris, dead aquatic vegetation, grass clippings and other organic waste buildup.

Bio-Buster™ is safe for use in recreational water bodies, livestock ponds and waste-water lagoons. Bio-Buster™ is Environmentally friendly and has no water use restrictions. Safe for humans, pets, fish, and wildlife.

## DIRECTIONS

**SPOT TREATMENT:** Apply pellets evenly and directly to the target (Muck) area. Apply 1 pound of Bio-Buster™ Pellets per 4000 square feet, once per month.

**FULL POND TREATMENT:** Apply 10 pounds of Bio-Buster™ Pellets per 1 surface acre of treatment area. Broadcast evenly throughout the entire water body. Apply Bio-Buster™ Pellets once per month.

### Calculations for treatment area

$$\text{Length x Width} = \text{Square Feet} \qquad \frac{\text{Length x Width}}{43,560} = \text{Surface Acres}$$
