

WATER TREATMENT PRODUCTS

Black Dye

Stronger than any
1 gallon or quart product.

SWEET WATER™ POND DYE CONCENTRATE

Net Contents: 32 ounces / 946 ml

Sweet Water™ lake and pond dye is manufactured to create a mirror black color, enhancing the aesthetic appeal to lakes, ponds and recreational water bodies. One quart of Sweet Water™ lake and pond dye will effectively shade 1 surface acre of water 4 – 6 feet deep. (Pond Dye should be used all season long.)

Application: Sweet Water™ lake and pond dye can be applied directly from the container. Simply pour into multiple locations in your water body. Dye will effectively move throughout the entire water body within 24 hours.

It is recommended that Sweet Water™ dye be applied early in the season with continued use on

an as needed basis, to keep a mirror black color. Rainfall, dilution or water discharge will determine how long the product will last in water.

Water Restrictions: Sweet Water™ can be safely applied to waters that are used for recreation, fishing, irrigation, livestock watering and other activities, with no restrictions on the usage of the water.

Caution: It is recommended that rubber gloves be worn when handling. Product can cause staining. Avoid contact with skin and eyes. Product can be safely removed with soapy water or a diluted mixture of bleach. If product is ingested, induce vomiting and contact a medical professional.

APPLICATION RATE

Apply 1 quart per surface acre of water

Calculation for surface acres of water:

$$\frac{\text{Length} \times \text{Width}}{43,560} = \text{Surface Acres}$$
