

Blue Wing™ WSP

SPRAY PATTERN INDICATOR

- ✓ Concentrated blue marking dye
- ✓ Increases efficiency of sprayable solutions
- ✓ Easily mixes with pesticides, fungicides, fertilizers and other products where marking is required
- ✓ Non-permanent coloring or staining
- ✓ Reduces missed target or non-target overspray
- ✓ Use in all types of spray equipment

Blue Wing™ WSP is a highly concentrated spray pattern indicator dye used for clearly marking the application of pesticides, herbicides, fertilizers or other sprayable solutions where application efficiency is required. Blue Wing™ WSP leaves a vibrant, visible, and non-permanent blue color to natural or manmade surfaces.

Directions for use: Product usage may vary upon required color per application. It is recommended to first use Blue Wing™ WSP at manufacturers recommended application rates. Apply Blue Wing™ WSP to actively filling vessel

prior to the addition of active ingredients used in applications. Agitation will fully disperse Blue Wing™ WSP throughout the entire sprayable solution.

Caution: Keep out of the reach of children. It is recommended that rubber gloves and eye protection be worn when handling of this product. If product is ingested, contact a medical professional. Product can cause non-permanent staining. Product can be safely removed with soapy water or a diluted mixture of bleach.

APPLICATION RATE

Easy to use water soluble packets. Simply apply one - 1.5 oz WSP per 100 gallons of solution. Apply to tank while filling or actively agitating to allow for complete dispersment and dilution of WSP. Apply additional WSP's if a darker color is desired.

Net Contents: 6 - 1.5 oz. Water Soluble Packets
